

MTE

Meter Test Equipment

Meter Test Stations

MTE-S 10.10, 20.10 and 20.20

The MTE-S 20.20 (Meter Test Station) is designed to test up to twenty single or three phase electricity meters at the same time. It is fully electronic, using only solid state electronic components and is operated via a personal computer system.

- **Measuring Ranges:**
Voltage 30 V ... 300 V
(Phase - Neutral)
Current 1 mA ... 120 A
(optional 200 A)
- **Measurement accuracy:**
<0.05% (optional <0.02%)
- **Efficiency at full load:** >85%
- **Software CAMCAL[®]** for the meter adjustment, measurement and reporting procedures
- **Harmonics generation and measurements**

**Experts in the field
of electricity meter
test and calibration**
